

Notification Appliances Electronic Siren

Fire alarm siren

Lifeco Model – LF/SI

Features

- Electronic siren
- Red colour
- Low current draw
- Indoor use
- Easy to install
- Low profile

LF/SI

Description

LIFECO LF/SI series electronic sirens are intended for fire alarm applications only. The housing is polycarbonate / ABS. It is designed to deliver maximum loud and clear siren sound generated by the electronic circuit inside.

This electronic siren will produce the sound similar to a motorized siren, which normally shall be distinguishable from normal ambient sound.

These sirens can be fixed on standard utility box.

Specification

Catalogue #	Model #	Voltage	Current	Sound output	Application	Colour
1055 – NA/FA	LF/SI	24 VDC	28 mA	105 dbA @ 1mtr.	Indoor	White *

* Please check the availability of other colors.

Application

All audible alarm devices shall be installed at a height of 2.2 m (min.) from the finished floor level (FFL) and 300 mm (min.) below from the ceiling level.

It is suggested that the sound pressure in an alarm zone shall be 15 db above the ambient sound level or 5 db above the maximum sound level.

These devices will not operate without electric power.
