Detection, Fire Alarm and Signaling Equipment | Fire Alarm Control Panels | Automatic Releases for Extinguishing Systems and Other Fire Protection Equipment

LIFECO Fire Alarm

Product Description

LIFECO Fire Alarm Control Panel and Release is a three zone conventional control panel. (See descriptions under LOCAL PROTECTIVE SIGNALING). The releasing devices are to be connected to the following panel Class B releasing terminals: "Mode Select", "Man. Release", "Abort", "Rel Press Switch", "Exting" and "Low P Switch". Each releasing output is supervised via an end of line resistor. The solenoid release circuit ("Exting" terminal) is rated 1 Amp. The Elite Abort Switch (model LF1823-10) is required for the agent release operation: it connects to the "Abort" terminals of the release. A Manual Extinguishant Disablement Switch (model LF1832-10) may be connected between panel solenoid outputs and releasing solenoid along with the 0V & FLT connections of the panel.

Details

Category	Automatic Releases for Extinguishing Systems and Other Fire Protection Equipment
